Dr. Pak Lun (Alan) Fung

Interdisciplinary Artist | Atmospheric Scientist | Data Art and Performance Practitioner

Contact Information

Email: pleakley9@gmail.com
Phone: +358 452304506
Nationality: Hong Kong/Finland
Residency: Espoo, Finland
Website: www.drfung.eu

Current Position

Postdoctoral Researcher, Climate Impacts and Adaptation Group
Finnish Meteorological Institute (FMI), Finland

Bio

Alan Fung is a Finland-based interdisciplinary artist and atmospheric scientist whose work explores relationships between environmental systems, human bodies, and lived experience. Drawing on expertise in urban climate science, air quality, environmental sensing, and data analysis, he creates performances, installations, and data-driven artworks that translate invisible environmental phenomena into embodied and sensory experiences.

His practice combines movement, data sonification, light, sound, and site-responsive methods to investigate themes of climate change, uncertainty, ecological interdependence, and more-than-human relationships. His works have been presented in Finland, Ireland, Austria, Lithuania, Hong Kong, and online international platforms, including Data Art for Climate Action (Austria), Pixelache Festival (Finland), and Live Art Ireland.

Fung's research-creation practice bridges scientific inquiry, public participation, and environmental storytelling, creating spaces where scientific knowledge and lived experience intersect.

Artist Statement

Alan Fung is a Finland-based interdisciplinary artist and atmospheric scientist whose work explores relationships between environmental systems, human bodies, and lived experience. Drawing on expertise in urban climate science, air quality, environmental sensing, and data analysis, he creates performances, installations, and data-driven artworks that translate invisible environmental phenomena into embodied and sensory experiences.

My practice investigates how invisible environmental processes become embodied through movement, sound, and spatial experience. Working between atmospheric science and artistic research, I use environmental data, performance, and participatory methods to reveal relationships between people, climate, and place.

I am particularly interested in translating scientific phenomena such as air pollution, urban heat, atmospheric change, and ecological uncertainty into experiential forms. Through performance, sonification, installation, and community engagement, I seek to create encounters where scientific understanding and personal experience coexist.

Rather than illustrating scientific facts, my work creates situations in which audiences can physically sense and reflect upon environmental systems that are often overlooked.

Education

Ph.D. in Atmospheric Science
University of Helsinki, Finland, 2022
M.Sc. in Atmospheric Science
University of Helsinki, Finland, 2018
B.Sc. in Earth Sciences
University of Hong Kong, Hong Kong, 2011

Skills

Artistic Methods
Performance Art, Live Art, Data Art, Data Sonification, Participatory Arts Practice, Site-Responsive Practice, Movement Improvisation, Environmental Storytelling

Research and Technical Expertise
Atmospheric Science, Urban Climate Analysis, Air Quality Modelling, Environmental Monitoring, Machine Learning, GIS and Spatial Analysis, Data Visualization, Creative Coding (Python, R)

Affiliations and Professional Service

GAP Creatives Database (October 2026–Present)
GAP Svenska Mentorship Programme (2026)
West Coast Cultural Lab (Canada), Advisor (August 2025–Present)
Information is Beautiful Awards (US), Volunteer (2025)

Selected Residencies and Invitations

2027 | **The Invisible City**
West Coast Cultural Lab, Vancouver, Canada (2027)
Invited Artist and Scientific Collaborator
Planned for a Climate Art Walk and interviews with local artists
Link to the announcement: https://wcculturallab.ca/artist-in-residence-2027/

2026 | Flesh as Witness Residency
Live Art Ireland, Ireland (2026)
Spent one month to cooperate with eight other artists
Link to the residency: https://www.live-art.ie/2026/05/01/flesh-as-witness/

Selected Performances, Exhibitions and Projects

2026 | The Two Gate Climbers
Flesh as Witness Residency, Live Art Ireland, Tipperary, Ireland
Live performance investigating co-growth between a human body and climbing plants.
Explores interspecies coexistence and reciprocal relationships between human and plant life.
Link to the video: The Two Gate Climbers

2026 | what happens when we really pay attention?
Pixelache Festival, Helsinki, Finland
Group performance incorporating butoh-inspired movement practices.

2025 | Inner Complexity
One-Day Stand No. 4, Mosaiikki Cultural Centre, Vantaa, Finland
Solo performance exploring personal anxiety and environmental uncertainty through embodied movement and spatial intervention.
Uses line, space, and embodied movement
Link to the workshop: https://www.theothersidepap.com/ods4
Link to the video: Inner Complexity

2024 | My Planetary Boundary
SideWalk 1st Edition, K Galleria, Vantaa, Finland
Solo performance investigating personal vulnerability, planetary boundaries, and human-environment relationships through the use of yoga mats as spatial markers.
Link to the workshop: https://www.theothersidevantaa.com/1st-ed-2024
Link to the video: My planetary boundary

2022 | The Echo from the Earth: The Melting City
Data Art for Climate Action Conference, Graz, Austria
Co-authored work accepted to the conference
Data artwork transforming sea-level rise information into sound
Link to the proceedings: Proceedings|Catalogue of the 2022 Conference on Data Art for Climate Action (DACA)

2022 | You and I, You and Me Workshop
Institutio Media, Vilnius, Lithuania
Investigated electricity as a medium for communication and environmental connection through wearable experimentation.
Link to the workshop: Workshop: You and I, You and Me

2015 | Double Bill One
Hong Kong
Performed in an A capella group
Link to the performance: Taikoo Place - a cappella-la-la : Double Bill One
Link to the performer's profile in Hong Kong: https://www.art-mate.net/doc/8272
